NABIL ASSILA BINTI AMRAN

## **ABSTRACT**

The need to change to modern education system, emerging technology of mobile phones and the rapid penetration rate of smart phones has given birth to Mobile Learning. This project intends to develop a personalized mobile game-based learning application for Standard 6 students in Malaysia on Science subject, aimed to enhance learning experience through the mobile game-based learning application, as well as to increase interest on subject matter through fun learning approach in pursuit of excellent academic performances. A mix of quantitative and qualitative method is used in data analysis process, following the Mobile Game-Based Learning (mGBL) Engineering Model. User acceptance testing was conducted to understand usefulness of the application to target user. Results show that the MGBL manages to capture student's interest in learning and that gaming approach does enhance learning experience by engaging the students in fun game play. Personalization feature that is adapted is a useful tool in promoting student-centered learning where student can take charge of their study, and be responsible for their study performance. It is hoped that this paper helped the society to understand the idea of mobile learning as the new way of learning for the benefit of the younger generation - Generation Y today.

## ACKNOWLEDGEMENT

Utmost gratitude to the Most Merciful, for giving the wisdom, strength, support and knowledge in exploring things; for the guidance is helping surpass all the trials that were encountered and for giving determination to pursue this study and to make this study possible. The success of this study required the help of various individuals for without them, this study might not be completed. Sincerest gratitude wished to the following people for their invaluable help:

To my parents, Amran Abdul Rahim and Norhayati Abu Bakar, for their endless love and blessings;

To Mr. Mohd Noor Ibrahim, the project's supervisor, for giving ideas in the accomplishment of the study, and for his patience, understanding and encouragement;

To Mr. Mohd. Taufiqur Rahman, for his guidance and thoughts for improvements that contributed to the study;

To Mr. Hairil Hafizi, who was always there during the process of this thesis, for the never-ending support;

And lastly, to the people who helped and contributed great ideas and advices, especially classmates and close friends for without them, this study would not be possible.

I am forever indebted to all for your love and motivation that keeps me going.

## TABLE OF CONTENT

<b>ABSTRACT</b>	ii
<b>LIST OF FIGURE</b>	iii
<b>LIST OF TABLE</b>	iii
<b>CHAPTER 1: INTRODUCTION</b>	<b>1</b>
1.1 Background of Study	1
1.2 Problem Statement	2
1.3 Objectives and Research Questions	3
1.4 Scope of Study	4
1.5 Relevancy and Feasibility of Study	5
<b>CHAPTER 2: LITERATURE REVIEW.</b>	<b>6</b>
2.1 Introduction to Mobile Learning	6
2.2 Game-Based Learning	9
2.3 Personalization in Mobile Learning	11
2.4 Related Work	12
2.5 Factors Influencing Adoption of M-Learning.	13
<b>CHAPTER 3: METHODOLOGY</b>	<b>14</b>
3.1 Research Methodology	14
3.2 Project Activities	18
3.3 Key Milestones	30
3.4 Tools	31
<b>CHAPTER 4: RESULTS &amp; DISCUSSION</b>	<b>32</b>
4.1 Introduction to App: RobotMGBL	32
4.2 Interface	34
4.3 Preliminary Questionnaire Result	37

4.4	User Acceptance Testing	.	.	.	40
4.5	Feedback	.	.	.	48
4.6	Overall Testing Result.	.	.	.	52
<b>CHAPTER 5: CONCLUSION</b>					<b>53</b>
<b>REFERENCES</b>					<b>55</b>
<b>APPENDICES</b>
