

## LIST OF FIGURES

	Page
Figure 2.1 after Scot et al. (2008) shows the ejector characteristic . . . . .	3
Figure 2.2 after Martin (1997) shows the ejector main components . . . . .	6
Figure 2.3 after McGovern et al (2012) shows the flow structure of an under expanded primary fluid flow and choked secondary fluid flow . . . . .	10
Figure 2.4 after Martin (1998) shows an ejector performance curve . . . . .	12
Figure 2.5 after Martin (1998) shows “Breaking” vacuum ejector . . . . .	12
Figure 3.1 shows the methodology chart . . . . .	16
Figure 3.2 an image from the engineering equation solver . . . . .	20
Figure 4.1 after [7] shows the four boundaries condition on a steam jet ejector ..	25
Figure 4.2 shows mass and energy balance for the jet ejector system . . . . .	27
Figure 4.3 shows an abstract image for the data sheet 78569-1 item# SLO 2238645/4 . . . . .	36
Figure 4.4 shows the efficiency factor “F” (left) and the area ratio “ $\phi$ ” (right) for a driving pressure of 5 and an inlet temperature ratio of 1 . . . . .	39
Figure 4.5 shows the efficiency factor “F” (left) and the area ratio “ $\phi$ ” (right) for an inlet temperature ratio of 1 and a compression ratio of 2 . . . . .	40
Figure 4.6 shows the efficiency factor “F” (left) and the area ratio “ $\phi$ ” (right) for a driving pressure of 5 and a temperature ratio of the mixture at the exhaust of the diffuser to the inlet of NCGs at the chest region set as 2 . . . . .	41
Figure A1 shows steam Rankine cycle when the condenser’s vacuum pressure is lowered . . . . .	52
Figure B1 shows the difference between the two types of conventional jet ejector a constant-pressure jet ejector and a constant area ejector . . . . .	53

Figure B3 shows main components of jet ejector associated with static pressure- velocity graph . . . . .	55
Figure B4 shows number of stages with equivalent vacuum pressure . . . . .	56
Figure B5 Shows Different Suction Pressure With Different Assemblies Of Jet Ejector . . . . .	57

## LIST OF TABLES

	Page
Table 3.1 Study plan for FYP 1 and FYP 2 .....	19
Table 4.1 A tabulated summary for an experimental study of steam jet ejector.	36
Table 4.2 shows the results of iterative solution and the percentage of deviation .....	37
Table 5.1 Assumptions for the boundary conditions .....	45
Table B2 shows summary of the application of jet ejector .....	54
