CERTIFICATION OF APPROVAL

INTELLIGENT PARKING SYSTEM

by

Khairani Akmalina Binti Kamaruddin

A project dissertation submitted to the Electrical & Electronics Engineering Programme Universiti Teknologi PETRONAS in partial fulfilment of the requirement for the Bachelor of Engineering (Hons) (Electrical & Electronics Engineering)

Approved:

Dr. Noohul Basheer Bin Zain Ali Project Supervisor

UNIVERSITI TEKNOLOGI PETRONAS TRONOH, PERAK

May 2011

CERTIFICATION OF ORIGINALITY

This is to certify that I am responsible for the work submitted in this project, that the original work is my own except as specified in the references and acknowledgements, and that the original work contained herein have not been undertaken or done by unspecified sources or persons.

Khairani Akmalina Binti Kamaruddin

ABSTRACT

The Intelligent Parking System is a system designed to prevent problems usually associated with car parks. Proper parking system in the urban areas has become becomes part of the successful business criteria. There are more shoppers get attracted to organized shopping complexes where ample, secure and effectively managed parking is provided. This project has focused on developing a system that will effectively manage the parking facilities at shopping complexes. This system aims in optimizing the use of limited parking spaces and at the same time increase customer satisfaction. The current system in place is manual and is biased towards the provision of security to the parked car. The proposed parking system takes into account that the drivers prefer to park at designated places. The system will be used to guide the driver to the available parking space. The image processing in other hand will detect and capture the car number plate and display in the LCD display together with that particular car designated parking space. Ultrasonic sensor system is being used to detect available parking space.

ACKNOWLEDGEMENTS

I am heartily thankful to my supervisor, Dr Noohul Basheer Bin Zain Ali, whose encouragement, guidance and support from the initial to the final level enabled me to develop an understanding of the subject.

Appreciate and thanks to my father, mother, brother and other family members who has been so tolerant and supports me all these years. Thanks for their encouragement, love and emotional supports that they had given to me.

Lastly, I offer my regards and blessings to all of those who have supported me in any respect and lending a hand during the completion of the project.
