

ACKNOWLEDGEMENT

First and foremost, I would like to express my highest gratitude to ALLAH S.W.T. our merciful god for the blessing and the courage that he gave me in finishing this final year report successfully. Secondly, I would like to thank my dearest supervisor, Tuan Haji Kamal Ariff Bin Zainal Abidin for his unlimited advice, guidance and support throughout the whole process of the project and also in the report making. Thirdly, not to be forgotten, I would like to express my gratitude to my previous supervisor, Dr Razali Bin Hamzah who has retired last semester for his guidance and unlimited advice. In addition, I would also like to thank my examiners who always offer me guidance and advice regarding to my project. Next, I would also like to thank PETRONAS Carigali (PPD-T personnel, TCOT and OSC personnel) and Flowserve Company for assisting me in making this project successfully completed. Without their assistance and co-operation, my project would not reach its targeted objective. Not to be forgotten, I would like to give a trillion thanks to the laboratories technician especially to Mr. Anuar and Mr. Faisal who always give me the helping hand and willing to offer me their technical expertise especially during the lab and experimentation process. Without the commitment, dedication, hard work and teamwork from all of the above parties, this project will not be finished in the proposed time. Hence, the sacrifice and hard work from all of them should be thanked and congratulated. Lastly, I would also want to thank my beloved parent, family members and friends for their infinite support which gives me the courage and confident in finishing my project successfully.
