CERTIFICATION OF ORIGINALITY

This is to certify that I am responsible for the work submitted in this project, that the original work is my own except as specified in the references and acknowledgements, and that the original work contained herein have not been undertaken or done by unspecified sources or persons.

SALIHAH BINTI SABRI

ABSTRACT

This paper documents the application of Bayes Theorem to represent the knowledge on Islamic Medication Expert System. The objective of the project is to improve the existing project that was an expert system (ES) for Islamic healing method on web platform to the mobile platform. The challenges in this project are to understand the coding, to develop database of the system and to develop an ES in mobile platform. It is an ES that is able to recommend relevant Islamic treatments based on the holy Qur'an and Hadith in response to the symptoms input by the user. In this project, ES concept is used to represent the knowledge on Islamic medication system which is called the diagnosis system. The diagnosis system can diagnose several sicknesses such as eye pain, fever, headache, stomach ache, and toothache based on the symptoms entered by user. After that, the system will provide suggested treatment from Islamic treatment concept which is based on Qur'an and Hadith. The suggested treatment comes together with some relevant action or gestures to be practiced by user to treat the sickness. With the system, user does not need to make appointment to see an expertise in this area for a therapy session. Users can practice the suggested treatment by themselves. Users may try this alternative method but there are some conditions that must be followed and the sickness is not very critical.

ACKNOWLEDGEMENT

In the name of Allah, The Beneficent, The Merciful.

First and foremost, the author would like to show her highest gratitude to Allah for His blessing and guidance in helping the author to successfully complete the Final Year Project. At the same time, the utmost gratitude for the author's Supervisor, Mr. Low Tan Jung and co-Supervisor, Puan Hanita Daud, for being a great help in providing relevant information related to this project as well as for their expert guidance, advice, recommendation, and support while working on this project.

Besides that, the author would also like to thank her beloved parents, Mr. Sabri Bin Mat Salleh and Puan Noriah Binti Razali for their moral support. Beloved daughter, Zara Binti Azrul Hakkim and special thanks to Shahnaz Zaida who is the person that develops the web based BIMES for her cooperation and guidance for this project.

Furthermore, thanks to all my friends who have helped the author directly or indirectly during this period of time for sharing their experience and knowledge in making the project succeeds. With the assistance and guidance in the project, 8 months of hard work and sacrifices was paid off. Without their full support and concern, this project is ceased to exist. Above all, I would like to be greatly grateful to Allah for the successful of this project. Hopefully, it will be useful for the human being.
